

Teatown Environmental Science Academy

July 1-July 26, Mon-Fri, 9am-3pm

Join Teatown and Pace University scientists and instructors for an intensive and challenging field-based environmental science summer program for high school students.

The Teatown Environmental Science Academy (TESA) provides invaluable experience for students interested in environmental research. Several alumni of the program have won awards at local and regional competitions and have received recognition at larger competitions such as ISWEEEP and Intel.

TESA is a fee-based program limited to 12 students who will be accepted on a competitive basis. Scholarship support is available on a financial-need basis.
